MOVING WITH

MOVING WITH ALL OUR HEART AND SOUL.**HYUNDAI MOTOR GROUP'S SOCIAL CONTRIBUTION OPERATIONS HAVE BEEN
STEADILY EXPANDING SINCE 2003.**

A TRUE HEART

Sincerity and trustworthiness have been the enduring force behind the Hyundai Motor Group's existence. Since the start of its social contribution operations in 2003, Hyundai Motor Group has singularly committed itself to creating a better world and future. Tapping our enthusiasm and passion, we remain undeterred in our progress toward a sustainable tomorrow.

Hyundai Motor Group's social contribution affairs took off in 2003, and have gained sizeable momentum over the years. The Group declared its pledge for socially responsible management in 2008, and in 2009 followed it by establishing the Corporate Social Responsibility Charter to fulfill its duty as a member of the global civic community. In 2016, the Group went one step further, proclaiming its vision of becoming a "Trustworthy Partner for Today & Tomorrow," which guides its humanitarian mission over the next decade. To implement the vision, Hyundai launched the "6 MOVES" projects centered on promoting and assisting startups, industry-academia collaboration, mobility-challenged people, traffic safety education, reforestation and climate mitigation, as well as student volunteerism. Through these initiatives Hyundai Motor Group has consummated a diverse spectrum of public-spirited assignments both in Korea and abroad.

In 2018, the entire staff of Hyundai Motor Group led the way in social contribution, enthusiastically tackling various issues caused by the nation's ageing population and polarizing well-being, in addition to

helping create jobs for young people. As a global corporate entity, Hyundai Motor Group steadily engaged and communicated with local communities around the world in which it operates its production and sales bases. By doing so, the Group undertook various contribution schemes sought by the local communities, and at the same time supported the United Nations Sustainable Development Goals.

Through the aforementioned activities, which have been carried out systematically, steadfastly and creatively, Hyundai Motor Group has endeavored to fulfill its vision: "Together for a Better Future." The 2018 White Paper on Social Contribution you are about to read is the essence of an earnest, year-long public contribution undertaken by Hyundai Motor Group. Through its worldwide humanitarianism, Hyundai Motor Group aspires to share the value of social contribution with its staff, stakeholders and the general public, and thus forge a consensus around companies' social responsibility.

Moving on to the future trajectory, Hyundai Motor Group will take the driver's seat to usher in a better world and future via its socially oriented schemes. These activities will mirror society's changing tides as well as aspirations. As always, we will draw strength from our innate fervor and tenacity, innovate and reinvent ourselves industriously, and do our utmost in social good as a trustworthy partner for today and tomorrow.

Thank you.

Chairman of Hyundai Motor Group
Chung Mong-Koo

MOVING THROUGH

CORPORATE PHILOSOPHY

Guided by Hyundai Motor Group’s corporate philosophy, core values and vision for the future, we are committed to achieving sustainable growth and fulfilling our economic and social responsibility as a global corporate citizen.

CORE VALUES

INNOVATION

VISION

Together for a better future

‘Together for a Better Future’ is our vision, representing Hyundai Motor Group’s firm commitment to the highest customer satisfaction as well as qualitative growth. Our resource circulation business structure generates synergies across numerous business sectors - including automobiles, steel and construction - and creates new value by bringing innovation to customers’ lives in diverse ways. With respect to people and the environment, Hyundai Motor Group will pursue further growth in a way that befits a world-leading enterprise.

Lifetime Partner in Automobiles and Beyond

To become a trusted lifetime partner of our customers, we will bring a new perspective to automobiles through innovative mobility solutions based on human-centric, eco-friendly technologies and services.

Leading the New Era of Steel

As an eco-friendly resource- circulation company, we will usher in a new era for the steel industry by providing high value-added products and services, while securing world’s best competitiveness based on cooperative relations with our stakeholders.

We Build Tomorrow

As a global leading provider of high-value engineering solutions, we will lay the foundation for a better world through cross-business synergies and convergence of future technologies.

MOVING TOWARD

CSR VISION

Trustworthy Partner for Today & Tomorrow

CSR SLOGAN

Under the slogan ‘Moving the World Together,’ Hyundai Motor Group is committed to exercising its CSR principles and expanding the number of people it serves by engaging in sustainable, development-oriented partnerships with society and applying its specialized knowledge in the automotive field.

CHINA

Hyundai Green Zone

HYUNDAI MOTOR COMPANY

Hyundai Motor Group has conducted its Hyundai Green Zone project since 2008 in Chakanor to prevent desertification in China.

Hyundai Green Zone Project

The Hyundai Green Zone Project is a global ecological restoration project that Hyundai Motor Group has been carrying out since 2008. The 1st Hyundai Green Zone Project was carried out from 2008 through 2013, and covered 50 million square meters in Chakanor, Apakachi, Inner Mongolia, which is a leading source of fine dust in China. We successfully improved an alkaline salt desert into grasslands with abundant grass. Since 2014, we have been engaging in activities to restore 40,000 square meters of the Baoshaodainao Nur, Zhenglan Qi and Haginor regions into an ecology that is suitable for the climate environment of Inner Mongolia. Also, the Hyundai Motor Group’s Happy Move Global Youth Volunteers, colleges students in Beijing, employees and their family members of Hyundai and BHMC, a joint venture, and other participants are continuing volunteer activities to prevent desertification. Hyundai Motor Group has conducting a wide array of social contribution activities, in addition to the Hyundai Green Zone Project which we have been carrying out for over 10 years. In recognition of such efforts, Hyundai ranked first in the automotive industry in the ‘China Corporate Social Responsibility Index’ evaluation conducted by the China Academy of Social Sciences in November 2018.

DYK Village

KIA MOTORS CORPORATION

DYK (Dongfeng-Yueda Kia) Village, which has been in operation since the Great Sichuan Earthquake, has been developing into a local community support project.

Beyond Disaster Recovery to Self-Reliance: 153 Houses Constructed

DYK Village started a new construction project for damaged houses in 2009 caused by the earthquake that occurred in Sichuan Province, southwest China. This is a key business promoted by Chinese factories, and in addition to housing construction, we are also promoting the development of local community self-reliance support projects through public facility construction and education support.

Young Protesters Group

Cultivating Future Engineers

Starting in 2014 in Jiangsu, China, we have expanded to Beijing, Shanghai, Wuxi, Tianjin and Cangzhou. In 2018, a total of 14 meetings were held in Beijing, Shanghai, Wuxi, Tianjin, and Jiangsu, where 842 students and 130 employee lecturers participated. In July, we cooperated with the Happy Move Global Young Volunteers Group to provide engineering education to 1,050 elementary school students in Cangzhou. The textbooks mainly used smart cars that move along lanes, cars that stop when they meet obstacles, and solar-powered cars. In addition, we trained students in carousel using thermoelectric elements and see-through headphones.

Supporting Chinese Women's Soccer Club

For the first time in the Hyundai Motor Group, Hyundai Steel took advantage of the Red Angels Women's Football Club's capacity to carry out the sports CSR project in Chongqing, China. Since 2016, the firm has entered into a three-year agreement with Daping Middle School in Chongqing, China and has provided ongoing support, including training their girls' soccer team, providing friendly soccer games, and helping to enhance their infrastructure. In 2018, Hyundai Steel invited Chinese youth soccer players to South Korea in 2018 to give them the opportunity to watch the company's Red Angels Women's soccer club matches and help them develop their skills by hosting friendly games between Korea and China. The soccer club also visited them in China to provide technical training and other support. As a result, not only did the Chinese Youth Girls' soccer team showed excellent performances in the league, but two of their players were scouted and played on Italian football teams.

Dream Village Project

HYUNDAI MOTOR COMPANY

We have supported villagers near Chennai by improving facilities for a better lives.

Improving Village Environment for a Better Life

Hyundai Motor India (HMI) is setting up five model villages in the Sriperumbudur block in Tamil Nadu. HMI works to help Tamil Nadu residents by improving school facilities to fulfill the right to education for children, improving washing facilities, promoting safe hygiene practices, improving health care, and installing solar street lights. They are trying to help children, youth, particularly girls and young females, enjoy their rights. They also provide vocational training and facilitates the growth of small businesses to enable young females who have earlier been marginalized to take part in various economic operations. HMI's Dream Village project helps the inhabitants claim their rights.

New Hope School

HYUNDAI ENGINEERING

New Hope School is a representative overseas social contribution activity that Hyundai Engineering is promoting to support education in the area near its worksite.

New Hope School

In order to join in contemplating social problems and finding solutions in the countries where it is doing business, Hyundai Engineering has been improving impoverished learning environments near its overseas business sites since 2010 to provide children with learning opportunities and to ease educational gaps. In 2018, we constructed a multi-room equipped with electronic blackboard and air conditioning Ahmad Yasabi Village's 33rd school (also known as New Hope School No.7), where the village of Goryeo is situated, including 16 computer desks and chairs for education. We also donated 3,000 braille plates in Uzbekistan to learners to students in 13 blind schools. This was to encourage those with visual impairment who suffer from a lack of educational facilities. Hyundai Engineering employees also formed one-to-one connections as a systematic instrument to enable students to receive education continuously.

Current Status of New Hope School

Sustainable Water Circulation Project

HYUNDAI MOTOR COMPANY

Hyundai Motor Company strives to secure safe drinking water.

Participant Interview

“As a partner, it is of great value not just for the organization but also for the people whose lives were touched through this effort. Hyundai has become truly instrumental in delivering this basic service and creating a difference in the lives of the people.”

YSDA, Misael Joan Santos

A Project to Create a Sustainable Water Recycling Village

On March 22, 2017, to celebrate UN Water Day, HMC began a new CSR program to help an underprivileged community in Tanai, Philippines gain water independence. HMC will build a rain water center in the mountain village to lay the foundation for sustainable operations.

Securing Safe Drinking Water Using Rain Water

Tandang Kutyo village in the Philippines, where the first rain water center was built, does not have access to the water supply system run by the government and its main source of drinking water (wells, valley, and spring water) are highly polluted with E. coli bacteria and arsenic, making it difficult for them to secure safe drinking water. The rain water center consists of rain water storage tanks (60 tons), water purifier filters and valves, automobile-shaped water sinks, and rainwater playgrounds, allowing the residents to secure safe drinking water from rain alone.

To Create a Sustainable Miracle

The significance of this project lies in helping the residents gain independence in securing drinking water supply by assisting them in operating the facility independently themselves. Accordingly, Hyundai Motor Company organized an independent operation committee in the village responsible for operating and managing the rain water center and also worked with NGOs and universities to create a foundation for their sustainable operation through regular public health and sanitation education and monitoring. Furthermore, the company will provide trucks equipped with water tanks and water pumps as drinking water vehicles. It will also provide young people in the village with training on operating and repairing vehicles so that they can supply water to other villages nearby, thus expanding the number of people who can benefit from the water center operation.

Building a Job Training Center

HYUNDAI ENGINEERING & CONSTRUCTION

Hyundai Engineering & Construction (HDEC) has provided skills training to students and has contributed to a rise the employment rate in the Philippines.

Training Skilled Employees for the Future of the Philippines

HDEC supports educational CSR projects to raise the employment rate in the Philippines. In the municipality of Rodriguez, the low employment rate threatens local residents' livelihood. Since the people of Rodriguez have very little skills at all, Hyundai E&C decided to build a job training center with KFHI (Korea Food for the Hungry International) in Rodriguez. Soon after, 64 students enrolled in the job training center to learn new job skills. In 2017, all 64 students who had trained at the center got licenses related to their newly acquired skills. Among them, 76.6% found a job right after they became certified. Meanwhile, HDEC has plans to hire employees from the job training center.

Improvement in Housing and Sanitation

HYUNDAI ENGINEERING & CONSTRUCTION

About a thousand people have benefitted from Hyundai Engineering & Construction (HDEC)'s CSR project aimed at resolving the fundamental problems arising from polluted water.

Saving People from Water Pollution

Indonesia, where six major construction sites are located, is the one of HDEC's most important countries. Indonesia has fourth largest population in the world and has enjoyed average annual GDP growth of 5%. But on the other hand, the stagnation of its impoverished population has seen very little improvement.

As a partner enterprise, HDEC has constantly considered how to forge win-win relationships in Indonesia. First, HDEC tries to understand the current situation. It turns out people of Indonesia have suffered from polluted water. So HDEC launched CSR projects in Indonesia to resolve fundamental problems so that sustainable CSR could be achieved in Indonesia. Because iron and lime are dissolved in rivers in the Pahae Jae district, the pollution around rivers is serious. Also, sanitary and drainage systems have not been properly installed, so sewage flowed directly into the groundwater. During the rainy season (nine months), it became much worse. Putrid odors were everywhere, and people suffered from dengue fever, malaria, diarrhea and skin disease.

In order to solve the problem, HDEC approached Indonesia with an international NGO 'Habitat'. HDEC has newly built 14 houses, 6 sanitary systems and 700m drainage in Cirebon, where HDEC's power plant is located nearby. In addition to building houses and installing sanitary and drainage systems, HDEC has regularly provided sanitary education to help local people lead healthier lives. More than a thousand people have benefitted from the 2018 CSR project in Indonesia.

Help to offer based on the Fourth Industrial Revolution

As many inhabitants of Sulawesi were significantly damaged in September 2018 by earthquakes and tsunamis, Hyundai Engineering worked with the Green Technology Center and Angel Swing to provide support based on drone mapping technology. This technology is a state-of-the-art technology that uses drone data platform to gather and process high-resolution spatial information to help with disaster recovery. The technology is expected to benefit the future disaster areas by enhancing their knowledge needed to gather and analyze data on local disaster areas. This project - not just delivering relief goods as was done before - means an international cooperative project that allows early response to disasters based on the Fourth Industrial Revolution Technology. Hyundai Engineering plans to carry out various actions of social contribution to the local communities we entered into.

Renovating 2 Schools in Dala Township

HYUNDAI ENGINEERING & CONSTRUCTION

Hyundai Engineering & Construction (HDEC) has built education facilities and provided supplies for underprivileged children in Myanmar, enabling a few hundred students to take classes.

New Hopes from Education

HDEC has promoted CSR projects in Myanmar by building education facilities and providing supplies for underprivileged children, high school students. Students of the Dala Township (Myanmar) used to study in a old school. They couldn't even take classes on rainy days as the raindrops would fall through the leaky ceilings. Since Myanmar experiences over 260 rainy days annually, it was hard to proceed with normal school classes and there were concerns that the school would collapse one day. To offer a better and safer place to study, HDEC started to renovated 2 schools in July, 2017, along with International organization Plan International. The renovation schools accommodate 2,200 students. The students of Dala Township are happy to have a clean and safe school, and they can take classes arranged according to a regular curriculum suitable for their respective grades.

Hope on Wheels

HYUNDAI MOTOR COMPANY

Hope on Wheels is Hyundai Motor Company's most prominent and longest- running CSR program that fights against pediatric cancer in the United States.

Launched in 1998, Hope On Wheels is America's most prominent childhood cancer support program. Apart from the donation by Hyundai Motors America (HMA), an additional \$14 is donated each time a Hyundai Distributor sells a new car. HMA also introduced the 20th Annual Campaign together with the NY Auto Show on April 19, 2018. They also held a special September event to celebrate the month of awareness of pediatric cancer. From April to October 2018, more than \$15 million in grants have been paid nationally. HHOW has donated \$145 million for pediatric cancer studies between 1998 and 2018. A total of 163 hospitals and study institutes for childhood cancer got funding. Hyundai Motors operates numerous social media and web portals, encouraging donations to increase public awareness of childhood cancer studies, and has conducted donation and communication campaigns through numerous charity events, including charity marathons.

Hope on Wheels 3 Main Activities

Making donations for pediatric cancer research

Enhancing in public awareness of pediatric cancer

Promoting a healthy society

CN Tower Climb
for Charity & Big
Bike Ride

HYUNDAI CAPITAL

Hyundai Capital Canada (HCCA)'s CN Tower Climb for Charity and Big Bike Ride have led to the social contribution participation of employees and has had a positive impact on the community.

Sponsoring Employee-led Charitable Activities

Hyundai Capital Canada (HCCA) is committed to providing employees a unique corporate culture and recognizes its corporate social responsibility to give back to the community. It fosters employees' active involvement in sponsored charitable activities, while also encouraging development of a strong team-based employee community. HCCA seeks to sponsor and support charitable activities that:

- Are organized and led by employees
- Have personal meaning and significance to employees
- Make a positive impact on the local community
- Actively involve employees' time, talent, and / or expertise, in addition to making a financial contribution

CN Tower Climb for Charity

HCCA takes part in the CN Tower Climb for Charity on a bi-annual basis, in support of United Way and the World Wildlife Fund. Not only do employees get the rare and exhilarating opportunity of climbing the CN Tower, one of the world's tallest landmarks, but they also take 1,776 meaningful steps towards a better future for the community and wildlife.

Big Bike Ride

HCCA also participates in the annual Big Bike Ride, organized by the Heart and Stroke Foundation of Canada. A team of 29 employees power one Big Bike around downtown Toronto to raise funds and awareness for critical heart disease and stroke research. This is a heart-pumping, cheer-thumping, big, fun ride which makes participants feel good while doing a good deed.

Hyundai Dream Center

HYUNDAI MOTOR COMPANY

A global social contribution project that raises self-sufficiency by providing vocational technical education aimed at solving educational imbalances in developing countries and creating stable jobs.

Hyundai Dream Center

Hyundai operates the Hyundai Dream Center, a vocational program to help young people in developing nations develop technical skills. Hyundai Dream Center is a project that we carry out in cooperation with Plan International Korea, and a venue through which we provide our advanced automobile maintenance skills to developing countries. The first Hyundai Dream Center was opened in Ghana in 2013, followed by those in Indonesia, Cambodia, and Vietnam. The Hyundai Dream Center in the Philippines, opened in 2018, provides technical education to around 90 youths annually. Recently, 78 outstanding students found a job at local Hyundai dealers. We opened our 6th Hyundai Dream Center in Peru in April 2019, accepting 63 local young people (43 male, 20 female) from low-income families having difficulties in finding a quality job, and plan to provide a quality education on various subjects for six semesters totaling three years. Through Hyundai Dream Center, we will support youths in developing nations in honing their talent and skills.

Project Information

Dental Trailer - Citizen Smile Campaign

HYUNDAI MOTOR COMPANY

Here, we introduce the Citizen Smile Campaign of Hyundai Motor Brazil (HMB), a company that strives to create healthy communities beyond simple economic coexistence with local communities.

Mobile Dental Clinic: 'Citizen Smile'

In addition to long-term partnerships with stakeholders, HMB has a strong interest in the safety and health of local residents. HMB operates a portable dental clinic called the Citizen Smile to improve the quality of life for residents near Piracicaba. HMB confirmed in 2014 that there are many children in need of dental services among the residents near Piracicaba, and in cooperation with Korean partner companies and Piracicaba Metal Workers Union (STMP) and local auto parts companies, is conducting the Sorriso Cidadão 'Citizen Smile' campaign, a mobile dental clinic that visits public schools and institutions in Piracicaba to help children who need dental care. The clinic also visits and provides dental health care to families in marginalized communities. HMB and STMP have been providing healthcare services to more than 45,000 people in more than 100 public schools and institutions since June 2014 through the Citizen Smile campaign, and will continue to do so in the future.

Project Information

Period

2014 Since

Purpose / Goal

Promoting health and wellness through free dental treatments to local residents

Beneficiaries

- More than 100 public schools and agencies
- Treated more than 45,000 people

MEXICO

Mobile Library

KIA MOTORS CORPORATION

The Mexico plant has been conducting library remodeling, language education, and reading education at nearby elementary schools, and operates a mobile library program using Kia vehicles.

The Neighborhood Library that Visits Every Week

Kia Motors Corporation Mexico plant in the Pesqueria region is expanding its mobile library business. First of all, the Green Light Project (GLP) Center in the city center of Pesqueria will normalize operation of the library through the remodeling of libraries in schools. In addition, as a digital system, the mobile library's books and visiting students are managed digitally, and it travels to four villages a week, making it a bona fide mobility program. Moreover, we utilize the expertise of NGOs to provide after-school language and reading education as well as artistic activities.

Pesqueria Regional Mobile Library Project (For elementary schools within a radius of 10km of KMM)

GLP Center

Normalization of library operation in schools through remodeling

- Infrastructure installation / maintenance, book provision and multimedia-based education (TV, DVD, computer)
- Kia's branding using the Enzy character

Mobility Program

Mobile library program operation (4 villages / once a week)

- Minibus import and local remodeling
- Visiting students and book management through digital system building

Language and Reading Education

Language and reading education using NGO expertise (for 2 schools)

- After-school education for 5th to 6th-grade students (60 students)
- Employee volunteer linkage to artistic activity / mentoring programs

Environmental Improvement and Child Education Support Program

HYUNDAI MOTOR COMPANY

In collaboration with Good Neighbors, Hyundai Motor Company is enhancing local environments and its children's education project in Valparaiso, Chile.

Project Information

Place
Valparaiso

Period
2016 since

Purpose / Goal
Enhancing local environments and its children's education project

Partnership
Good Neighbors

From Waste Dump to the Most Beautiful Paradise City

Valparaiso means the "stairway to heaven." It is a beautiful port city and was listed as a UNESCO World Culture Heritage site. However, today the city suffers from a serious environmental pollution and sanitation problem as it produces 100,000 tons of waste annually from 170 waste landfills. The city also suffers from extreme economic inequality that has created an imbalance in children's education. In order to solve this problem, Hyundai Motor Company donated two recyclable waste collection trucks equipped with a plastic and waste paper compressor and is helping the residents and children to collect waste themselves and make profits from the process. In this way, the program can enhance the environment while raising funds for the cause. Meanwhile, an environmental education center has been built to provide local children with environmental education and promote children's rights.

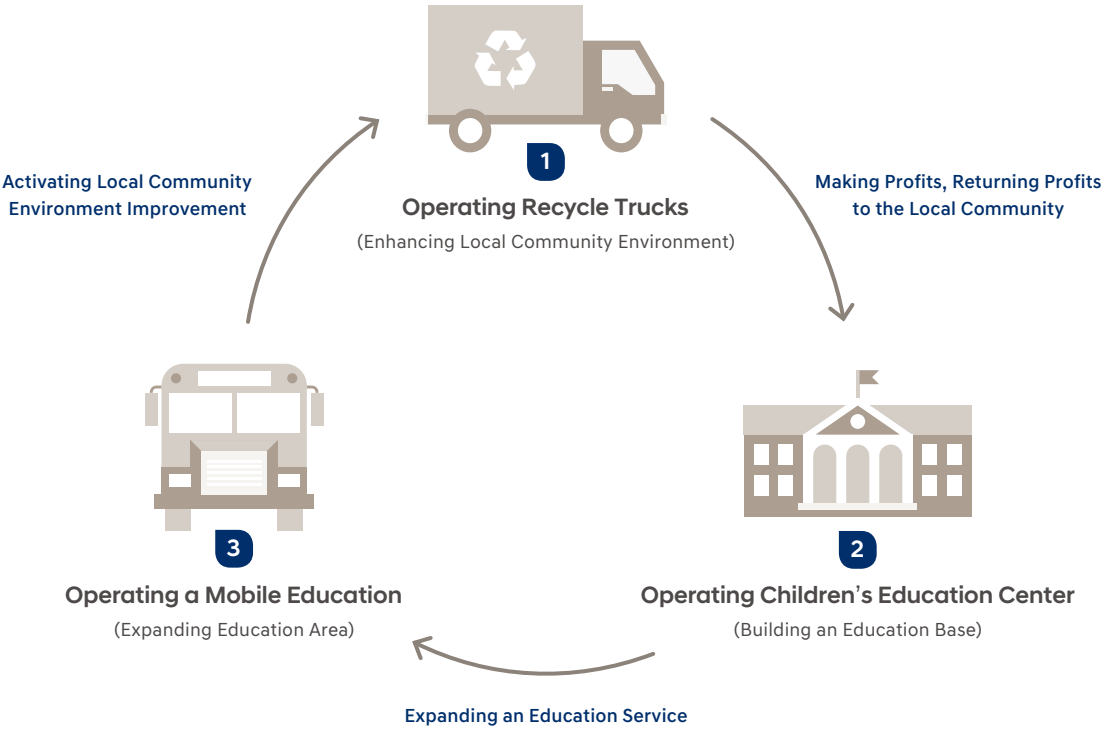

Competition for Best Waste Collector

Since last September, Hyundai Motor Company's recycling truck went on a tour of schools in Valparaiso to collect recyclable waste. The recyclable waste collected by them will be sold under various product categories and the funds raised from sales will be used for improving schools. As part of this program, HMC held the ReciclatoN-Recycling Contest in collaboration with Good Neighbors. The purpose of the contest is to encourage children to learn how to separate waste. Children separate household waste, then HMC visits their house to collect the waste accumulated and gives rewards to the school that has sorted the most waste, taking the number of students into account. The contest began in April and more than 19,000 children from 50 schools are expected join the contest. We hope that children's enhanced awareness of the recycling process obtained from the contest will contribute to a cleaner environment in Valparaiso.

Participant Interview

"The project began with a shared desire to create a sustainable society in Valparaiso by HMC, Good Neighbors and the local government of Valparaiso. There are visible changes being made in Valparaiso resulting from the partnership with HMC. We hope that even more shared values will be produced through this project."

Managing Director of Good Neighbors Chile

- Vehicle support through various mobility programs

Green Light Reveals New Life

The Green Light Project (GLP) is Kia Motors Corporation's signature CSR program that seeks to promote universal rights to secondary education, job training and public health, as well as self-reliance of local communities in underdeveloped countries. Since the first center was built in 2012, GLP Job Training Centers, schools and public health centers have been constructed in eight communities in seven African countries, with the addition of a new region each year. Lending its business acumen as an automaker, Kia Motors Corporation is also providing vehicle support through various mobility programs. The GLP is aimed at establishing a sustainable business model over a 5-year sponsorship period before transferring it to local communities for autonomous management.

Hyundai Safe Road Traffic Safety Program

HYUNDAI MOTOR COMPANY

For the top priority of our CSR strategy - safety, HMCIS developed the Hyundai Safe Road Traffic Safety Program for kids and parents in 2016.

Unique Road Traffic Safety Education for Russian Children

Hyundai Safe Road Traffic Safety Program is a child safety education program supported by the Education Ministry and the Federal Road Police. The program comprises of 20 lessons and extra tasks, five master classes for parents, a course for educators teaching how to execute a kindergarten program, unique contests for all participants, 360-degree monitoring, and a program for children (2 years). Special traffic safety events, such as the Traffic Safety Corner, were also held by HMCIS. The program promotes a systematic approach to traffic safety, a decrease in the number of deaths caused by road traffic, and suggestions by the Russian Ministry of Education and Road Police.

Project Information

Place

4 Regions
(Moscow, Moscow region,
St. Petersburg, Leningrad region)

Participants

57 Kindergartens
477 Teachers
5,617 Children

SLOVAKIA

Bike KIA

KIA MOTORS CORPORATION

Bike KIA is a project to build and repair bicycle paths along the parks and lakes near the factory in Slovakia. It is the focal CSR project of the Slovakia factory.

Bicycle Path for the Future

Kia Motor Corporation has focused on bicycles as an alternative to motor vehicles for commuting and has recognized that bicycles are especially popular among younger generations. With recent interest in health and the environment, we realized the need for safe, private roads, so we started to build bicycle paths. The Slovakia plant is building a new 5km-long bicycle path annually, and is also involved in the 34km bike path project of the provincial government and aims to connect all paths by 2020.

Goal & Rationale

- Increase the number of cyclists in the region by expanding bicycle routes and organizing promo events
- Cycling as an alternative means of transport to cars (possibility for commuting to work)
 - Cycling is very popular nowadays (specifically among young people)
 - Cycling is good for health and is eco-friendly
 - Proper conditions need to be built for safety cycling, especially for children (not cycling on the side of roads)
 - Positive impact on whole Zilina region and tourism industry

SOS Children Villages

HYUNDAI MOTOR COMPANY

Hyundai Motor Manufacturing Czech (HMCZ) is dedicated to protecting children's rights.

Give Children a Hopeful Future

As a foundation to support the underprivileged, SOS Village for Children in the Czech Republic started in 1969. They worked with other organizations and government institutions of protection to help strengthen family ties, offer care, provide youth education and training. They have continued to help children, youth, and single mothers. In conjunction with the SOS Village for Children, HMCZ offers economic and other assistance to needy children through numerous initiatives and events. In 2016, a race event organized by the SOS Village for Children raised money. A total of 68,000 CZK was raised and the participants ran a total of 36,000 km. In 2018, HMCZ take part in the Urban Challenge to showcase its projects and vehicles. A total of 10,000 children also participated in the SOS village event.

Aid for Needy Students

HYUNDAI MOTOR COMPANY

Hyundai Assan Otomotive Sanayi (HAOS) has helped the poor, cold-stricken learners not to lose hope.

Help For Students In Need

Hyundai Assan Otomotive Sanayi (HAOS) was thinking about how it could help the needy learners who are struggling under winter weather. With the assistance of employees and distributors, they were able to contact the needy learners. And 233 checks (250TL) could be distributed with the assistance of distributors and members from five towns (Ağrı, Diyarbakır, Mardin, Batman, Şanlıurfa) east of Turkey. A total of 233 learners in need has benefited. This activity was especially important in that it was performed with members' involvement, which also elevated our brand image in the eyes of the distributors. HAOS Bulletin and local newspapers also featured the above operations.

UK

Stand Up To Cancer

HYUNDAI MOTOR COMPANY

Stand Up To Cancer is an annual fundraising campaign that brings the UK together to accelerate progress in life-saving cancer research.

Attracting Attention to Cancer Research

Brought to you by Cancer Research UK (CRUK) and Channel 4, Stand Up To Cancer is an annual fundraising campaign that brings the UK together to accelerate progress in life-saving cancer research. Stand Up To Cancer takes developments in the labs and accelerates them into brand new tests and treatments for cancer patients who need them right now.

Participatory Donation through a Special IONIQ

Hyundai Motor UK (HMUK) has thought long and hard about how to find a more convenient and more interesting method of donation that catches people's attention. The result was the creation of the world's first tap-to-donate Contactless Car - a specially modified Hyundai IONIQ Electric. Five devices gathered from donated funds are installed on the outside of the IONIQ, specially created to support Stand Up To Cancer. When a debit card is tapped on these devices, a donation is collected, and the accumulated donations are displayed on an LED number board. The donor can jump in the car, take a selfie and pin it to the exterior with hundreds of photos of people who have participated far and wide. These small contributions are gathered quickly so people can participate in the donation together, and HMUK's idea stands out because donors can enjoy having their faces covering this special car.

Campaign Achievement

HMUK pledged to raise CRUK £350,000. Over the past two years, Hyundai Motor UK (HMUK) has raised over £600,000, surpassing their staff's financing target by 320 percent in 2017. In February 2018, HMUK also donated £50 for all test runs, enabling clients to take part. Hyundai employees have been involved in various events such as trekking three peaks, running marathons, selling bread and even dying their hair orange.

Hyundai Stand Up To Cancer TV commercial

Hyundai wanted to produce a TV commercial to thank all those who helped Hyundai raise funds through its 'Stand Up to Cancer' campaign for cancer patients. They preferred a TV commercial to be based on a simpler, more direct approach rather than that of a standard product advertisement. This resulted in the production of the TV commercial with little cash. There was no use of make-ups, costly sets, pricey locations, influencers or celebrities. Both the Hyundai team members and the producers participated in the procedures of road casting and pre-production to save cash and channeled advertising to finance more. In addition to expressing gratitude through this TV commercial, Hyundai has also conveyed a message that the money could be used more usefully elsewhere by saving the cost of making a usual "glossy ad."

Description

Film advertisement created by Innocean, United Kingdom for Hyundai, within the category: Public Interest, NGO.

Kids' Auto Park
(Seoul, Ulsan)

HYUNDAI MOTOR GROUP

We are operating an experiential traffic safety education facility called Kids' Auto Park to contribute to creating a safer world for children.

The Largest Children's Traffic Safety Experience Facility in Korea

Kids Auto Park is Korea's largest children's traffic safety experience facility (approx. 3,000m²) established by Hyundai Motor Group at Seoul Children's Grand Park in May 2009. It features various educational facilities such as the 'Auto Virtual Experience' facility, license test center, auto booths and others. Visited by more than 140,000 children since its opening through 2018, the biggest advantages of Kids Auto Park are the fact that the children are able to have a direct eye-level experience and the experience-oriented education is conducted by professional teachers. Its differentiating factor is that you can have experiences from the perspective of both the pedestrian and the driver. In 2018, the educational program achieved a 95% satisfaction rating and 98% said they would return to visit the facility. In short, Kids Auto Park provides interesting and fun safety education for children and is gaining popularity among children and parents alike.

Kids' Auto Park Ulsan will be launched in 2019

To enhance the road safety of local communities, we have partnered with Ulsan city to create a children's traffic experience hall called "Kids' Auto Park Ulsan" in Bukgu Ulsan, covering an area of 1,330m² which is scheduled for completion in 2019. This will also be a chance for children to experience driving and road safety by trying out the "Kona Mini Electric Vehicle" which Hyundai Motors developed with the social responsibility company Easy Move.

Gift-Car Campaign

HYUNDAI MOTOR GROUP

The Gift Car Campaign provide car and business consulting to help low-income and vulnerable groups become economically independent.

Gift Cars for Racing towards Dreams

The Gift Car Campaign is a start-up support program that helps low-income and vulnerable groups become economically independent by owning a car. The campaign selects people with the will to start up a business and provides 'gift cars' suitable for their entrepreneurial goals among Hyundai Motor and Kia Motors Corporation's vehicles such as light cars, vans, and 1-ton trucks. Recipients are selected by evaluating their self-reliance, business plan, and need for support. After entrepreneurial training is completed, the vehicle and business funds are provided. After the support, we continue to provide support for recipients through continuous management consulting for one year.

Project Performance

The true achievement of the gift car campaign, which has been in operation for the last nine years, goes beyond the number of vehicles provided to enabling disadvantaged persons to find new hope and establish a stronger basis for a better life.

Happy Move Global Youth Volunteers

HYUNDAI MOTOR GROUP

Each year, we work with more than 1,000 university students to provide services in accordance with the characteristics of each country through Happy Move.

Happy Volunteering by Warmhearted Youths

The Happy Move Global Youth Volunteer Corps has been Korea’s largest volunteer group for college students since its inception in 2008. In order to fulfill our social responsibilities of ‘raising warmhearted global youth leaders’, Hyundai Motor Group dispatches about 1,000 university students overseas every year to carry out volunteer activities such as local, cultural, environmental, and educational services according to the characteristics of each country.

Happy Move 2.0, A New Start

The Happy Move 21st Volunteer Corps was established in 2018 with the goal of ensuring the personal growth of volunteer members and independence of local residents. We plan to overcome the limits of one-off dispatch by conducting regional development projects for at least three years in specific areas, and we will make plans to allow university student members to communicate directly with residents and experience the international development cooperation process so that they can put forth their own ideas for the development of local communities. The 21st Volunteer Corps conducted activities relating to public facilities, housing, school construction and preservation of World Heritage sites in six regions of three countries.

Happy Move 10-Year Performance

The Happy Move Global Youth Volunteer Group, which celebrates its 10th anniversary, is dispatched to 21 countries all over the world and carries out service and sharing in a wide range of fields such as architecture, environment, culture and education. It has established itself as a main provider of overseas volunteering activities for university students.

Participant Interview

“The moments of working hard, educating kids, and supporting in areas that need help have given me absolute bliss in life, and thanks to the strong bond with my team members, I am able to withstand the hectic schedule. That is what Happy Move is all about.”

H-OnDream Social Venture Audition

HYUNDAI MOTOR GROUP

We are fostering social venture having innovative and creative ideas that can contribute to job creation and social problem solving.

A Leading Role in the Korean social venture Ecosystem

As Korea’s largest entrepreneurial support and job creation initiative for youths that began in 2012, we select 30 social enterprises every year and provide systematic programs such as start-up support of up to KRW 100 million per team, entrepreneurship training and consulting. The project, which is being carried out with the Ministry of Employment and Labor, the Hyundai Motor Chung Mong-Koo Foundation, and the Korea Social Economic Development Agency, has discovered a total of 210 innovative start-up teams as of 2018, generating more than 1,000 jobs and achieving sales of over KRW 50 billion. In addition, this project has become an important cornerstone of Korea’s socioeconomic ecosystem, and contributes to the resolution of major social issues of the United Nations’ designated sustainable development goals (SDGs). From 2017 onwards, the teams are divided into ‘Incubating’, which supports start-up teams, and ‘Accelerating’, which supports growing teams. The ‘Accelerating’ division focuses on social enterprises that are likely to grow over the next five years, and then matches them with specialized accelerators, thereby helping Hyundai Motor Group grow into a social enterprise that represents Korea through increasing corporate value.

Cooperation Model

H-Jump School

- University Student Education Volunteer

HYUNDAI MOTOR GROUP

H-Jump School is a volunteer corps that nurtures passionate and talented university students who are serving as volunteer teacher for low-income family's children.

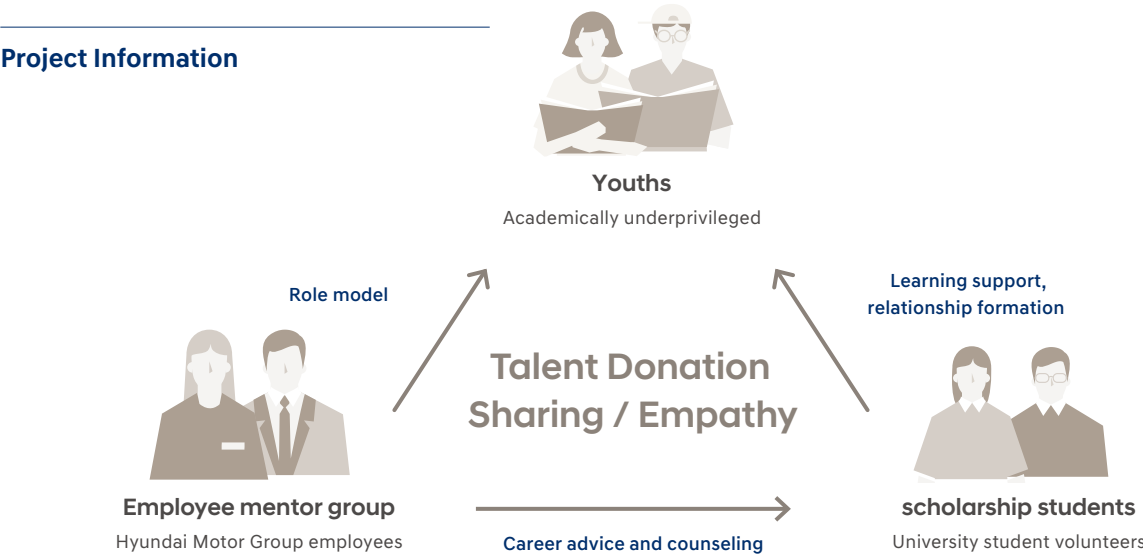

Beautiful Chords Generated through Trilateral Cooperation

The program is designed to nurture excellent college students and to instill in them a spirit of service while providing a liberal arts education. We have been running this program for five years to foster future talents and to bridge the gap in youth education. We provide quality education and mentoring for outstanding college students, and these college students go on to serve as teachers for vulnerable youths. In addition to the scholarships offered to select college students, we also provide mentoring opportunities with the H-Jump School mentor group, which consists of 200 people, including Hyundai Motor Group employees, lawyers, medical professionals, and social enterprise representatives. The H-Jump School distinguishes itself from other public-private partnerships in that it is a three-way partnership between government, private enterprise and social enterprise. The trilateral cooperation model is meaningful in that it is more effective in achieving the program's public service goals thanks to social enterprise participation rather than the government-private enterprise bilateral cooperation model which focuses only on economic efficiency.

Zero Traffic Accidents for Children Campaign

HYUNDAI MOTOR COMPANY

This campaign is to prevent traffic accidents by providing commuter vehicles with new traffic safety devices so that we can achieve zero traffic accidents for children travelling to school.

Hyundai has been working with the Citizens Coalition for Safety, a professional body which promotes traffic safety, since March 2016 to prevent traffic accidents and provide commuter vehicles and new safety devices with the aim of achieving zero accidents for children travelling to and from school. The campaign provides safe travel for around 3,700 children every day, covering 4,200 kilometers. Parents or childcare centers can apply for support, and their application is then verified by on-site visits or professional inspections. Successful applicants then receive support in the form of the latest safety technologies to be attached to their vehicles, or are given safety equipment that enables their vehicles to comply with the Serimi Act, which mandates the presence of a guardian in vehicles used by children under the age of 13 for travel to and from school.

Campaign Performance

Green Trip

KIA MOTORS CORPORATION

The Green Trip initiative provides special opportunities for travelers with disabilities to enhance their quality of life and make special memories.

As Kia Motors’ representative domestic CSR program, Green Trip offers various means of travel for people with disabilities and their families. The program, launched in June 2012, has provided a total of 2.7 million km of travel to 44,073 beneficiaries as of December 2018. During 2018, it became easier to make reservations using the Green Travel website and 9,320 people experienced a special trip. By 2020, we plan to provide 10,000 travel opportunities to 60,000 beneficiaries.

GLOBAL CSR STRATEGY

As public interest in sustainable growth has been steadily increasing, so are calls for corporations to create social value through their business operations. Moreover, non-financial factors including the environment, social contribution and governance are considered during the process of credit evaluations. As a result, creating social value has become an essential factor not only in securing sustainable future growth engines, but also in evaluating corporate value. To stay in step with these developments in the business environment, Hyundai has upgraded our strategy for creating shared value (CSV) by realigning business operations with the solutions for social issues and strengthening the content of our social contribution programs. By linking the CSV strategy to all our business operations, we will transform the economic value we create into social value, which will bring about positive changes in all of the local communities in which we operate.

DOMESTIC Traffic Safety Campaign with Robocar Poli

This Hyundai Motor global project of continuously provides traffic safety experience programs for kindergartens and daycare centers in Korea such as traffic safety classes, education in remote areas and a Traffic Safety Experience Center. In 2014, the campaign was conducted in conjunction with domestic and overseas sales bases. In addition, a variety of programs were expanded, including a new installation of the Robocar Poli Kids Zone in China.

OVERSEA Hyundai Green Zone

Hyundai Motor Company has been carrying out the Hyundai Green Zone project since 2008 to prevent desertification in the inner Mongolia area. The project is aimed at revitalizing 50 million m² of land centering on the Chakanor region in China, which is the source of harmful yellow dust. From 2014, the company plans to carry out the second Hyundai Green Zone project in the Boshadenor in Zhenglan Qi area with the goal of creating 40 million m² of grassland by 2018.

GLOBAL CSR PROJECTS

KIA MOTORS CORPORATION

Kia Motors Corporation is the world’s 10th largest automobile brand as of 2018. Today, Kia Motors Corporation is undertaking change and innovation to establish itself as a forward-thinking automobile brand that can bring the infinite possibilities of future mobility into the daily lives of every customer around the world. We are clearly aware that responsible growth is the essence of any business, and we will make consistent efforts toward balanced and sustainable development by sharing the fruits of growth with all of our stakeholders.

Employees	Assets(KRW 100 million)	Revenues(KRW 100 million)
52,578	517,866 ²⁰¹⁸ 522,944 ²⁰¹⁷	541,698 ²⁰¹⁸ 535,357 ²⁰¹⁷

GLOBAL CSR STRATEGY

Kia Motors Corporation has established a global social outreach value scheme and has set its main CSR values as promoting the universal right to mobility and taking on the challenge of improving the quality of life. Kia’s signature social outreach projects aim to bring these new values to life. The first is the Green Light Project (GLP), a global initiative, and the second is a domestic effort called ‘Green Trip’. Kia Motors Corporation strengthen the operation of its global CSR activities with the aim of achieving sustainable growth in partnership with stakeholders.

OVERSEA Green Light Project

The Green Light Project (GLP) is Kia Motors Corporation signature CSR program that seeks to promote universal rights to secondary education, job training and public health, as well as self-reliance of local communities in underdeveloped countries. Since the first center was built in 2012, job training centers, schools and public health centers have been constructed in eight communities in seven African countries, with the addition of a new region each year. Lending its business acumen as an automaker, Kia Motors Corporation is also providing vehicle support through various mobility programs.

The GLP’s fundamental goal is to establish a sustainable business model over a five-year sponsorship period before transferring it to local communities for autonomous management. In July 2018, GLP middle school in Mozambique and Malawi was successfully transferred to local society. Malawi’s GLP School is run by a private school and managed by the ‘Hope For People Empowerment Ministry’, a local community NGO. Thanks to relatively cheap tuition and quality education services, schools that started with 160 students have now grown to nearly 1,000 students. As a result, we can achieve fiscal independence by securing about 90% of the school’s operating expenses with tuition revenue.

HYUNDAI STEEL

Hyundai Steel, the first steel company in Korea, provides distinctive value to its global customers and continues to take strong steps towards becoming a ‘century-old steelmaker.’ Hyundai Steel strives to share growth with stakeholders based on its social contribution vision of “Hyundai Steel Always with You.”

Employees	Assets(KRW 100 million)	Revenues(KRW 100 million)
11,522	333,049 ²⁰¹⁸ 333,738 ²⁰¹⁷ 323,893 ²⁰¹⁶	207,804 ²⁰¹⁸ 191,660 ²⁰¹⁷ 156,460 ²⁰¹⁶

GLOBAL CSR STRATEGY

Hyundai Steel established its social contribution vision and long-term strategy by taking its business competency and social demand into consideration. We execute sustainable and faithful social contribution activities based on the three core values of value circulation, stakeholder engagement, social innovation, guided by the social contribution vision of the “Hyundai Steel Always with You.”

OVERSEAS Happy Safe Village Project

Hyundai Steel is working on a Happy Safe Village project in Chennai, India since 2018. By installing solar streetlights and CCTVs and building new toilets, the Happy Move Global Youth Volunteer Group of Hyundai Motor Group has also dispatched 60 volunteers two times a year to help.

OVERSEAS Sports CSR

By utilizing the potential of Red Angels, the women’s soccer club of Hyundai Steel, we launched Hyundai Motor Group’s first sports CSR project in Chongqing, China. We are planning to lead the development of the Chinese community and physical

education of students by training with Red Angels, inviting them to Korea to watch Red Angels football matches, and supporting the improvement of infrastructure.

OVERSEAS Local Development Project

Hyundai Steel has been actively supporting the construction of a job training center and a self-reliance model for young people and women in the North Samar area in the Philippines since 2017. Through developing the curriculums for job training and fostering educators and income-generating activities, we contribute to the social change and development of local communities. In 2018, 30 volunteer employees were dispatched to strengthen village and school facilities.

HYUNDAI
ENGINEERING &
CONSTRUCTION

Hyundai E&C (HDEC), a flagship affiliate of Hyundai Motor Group, plays a key role in joining the Group together with Hyundai Motor and Hyundai Steel. In 2016, Hyundai E&C achieved a record-high operating profit of more than US\$880 million for the first time in the domestic construction industry, thereby enhancing its status and consolidating its foothold as a sustainable global company.

GLOBAL CSR STRATEGY

Hyundai E&C's social contribution strategy is rooted in the desire to improve the living conditions of low-income families in underdeveloped countries. Since building a community center in the Philippines in 2011, HDEC has actively contributed to local communities in developing countries where it operates by using profits for specific social needs and circumstances. In 2018, Hyundai E&C operated 43 CSR projects (educational centers, sanitary facilities, job-centers, hospitals, etc.) in 20 countries around the world.

OVERSEAS 'H-CONTECH' Global
Volunteers

Taking advantage of Hyundai E&C's expertise in the construction industry, the company helps low-income nations by supporting public infrastructure, technical education and livelihood. By doing so, HDEC can provide both emergency relief and solve fundamental problems. H-CONTECH, the first global technical-culture linked volunteer group, was established in 2017 to stimulate the growth of developing countries and strengthen technological competitiveness by donating technological skills. The first H-CONTECH successfully conducted global CSR activities in

Sarulla, Sumatra Island of Indonesia and opened seminars for technical sharing and cultural performances with UI University, which is a promising educational institute in Jakarta, the capital of Indonesia. In 2018, 2nd H-CONTECH has conducted in Hanoi & Haiphong, Vietnam.

HYUNDAI
ENGINEERING

Established in 1974, Hyundai Engineering has built core competencies covering the entire project life cycle, including feasibility study, design, procurement, commissioning, and operations and maintenance. It has been widely recognized for its extensive experience and accumulated technological expertise in many regions of the world.

GLOBAL CSR STRATEGY

Hyundai Engineering's mission is to become a world-class engineering enterprise that can transform the world into a more beautiful place by enhancing the lives of humans through the development of innovative technologies. Firm in this conviction, Hyundai Engineering plans to resolve diverse community problems by gaining a deep understanding of the regions in which it operates.

DOMESTIC Gift House Campaign

This campaign contributes to housing stabilization and disaster prevention by using modular technology for homes that are vulnerable to disasters. Hyundai Engineering selected five households living in Jangheung-gun, Jeollanam-do Province in 2018 and built a complex-type gift house on the property of Jangheung-gun. The unique characteristic of this gift house is that for the comfort of the inhabitants, a warehouse is supplied in the outer space. As a result, the elders were able to live in safe homes instead of poor dwellings where there was a danger of collapse.

OVERSEAS New Hope School

The company has initiated the New Hope School project since 2010. To this end, it provides learning opportunities and reduces educational disparity for children in areas near its overseas project sites that suffer from impoverished educational environments. Starting in 2010, Hyundai Engineering has founded and donated eight New Hope Schools in Cambodia, Equatorial Guinea, Bangladesh, Philippines and Uzbekistan. We also help the children and their families increase their household income and make self-reliance possible, while setting up one-on-one matches between children and employees so that stable financial aid can continue. Hyundai Engineering will consistently increase the chance for education for underprivileged children and will extend its support to adults, offering them skills development training which will gradually lead to job creation.

HYUNDAI MOBIS

Hyundai Mobis, a future automotive innovator leading the future mobility community, focuses on creating key technologies for future automobiles, such as autonomous driving, connectivity, and hydrogen cars. They strive to connect the world with vehicles and build a green planet based on our key capacities. They achieve sustainable growth based on new technology development that will change the future society and deliver optimized customer service. They will also interact with all stakeholders, generate shared values and meet their social responsibility.

GLOBAL CSR STRATEGY

We are carrying out social contribution activities through our main base in China, which has a large number of corporations, and we will continue to perform such work consistently in Germany as well. Meanwhile, we will expand the number of countries in which we conduct social contribution activities. For instance, in India our efforts will be centered on ensuring stable livelihoods and regional development, while in the United States we plan to conduct educational volunteer activities utilizing our representative Junior Engineering Classes project.

OVERSEAS Junior Engineering Classes

Hyundai Mobis expands its Junior Engineering Class to the local communities of foreign corporations to cultivate kids with exceptional science talent. In 2018, in addition to the seven Chinese corporations and German research institutes that had previously implemented the program, the company introduced the program at Hyundai Mobis Technical Centre in North America (MTCA). And ten Hyundai Mobis staff provided solar-car classes to 40 Durfee Elementary School students in Detroit, USA. In 2019, their classes will also be introduced in Turkey, Czech Republic and Slovakia.

OVERSEAS Children's Archery Classes

In November 2017, we launched Children's Archery Classes in Tianjin, China, spread the growth of archery and nurture talented archers. The current athletes and supervisors of our company's women's archery team directly conduct lectures, demonstration games, and archery lessons. In order to maximize its effect in the future, we will continue to operate in Tianjin, which has a great interest in archery.

HYUNDAI WIA

Hyundai WIA, a global auto parts maker and leading brand in the Korean machine tools industry, has been supplying innovative products to manufacturers with its high quality and outstanding performance.

74,874²⁰¹⁷
75,894²⁰¹⁶

GLOBAL CSR STRATEGY

As a corporate citizen, Hyundai WIA helps to develop local communities and actively engages in social contribution activities. Our vision is to contribute to the socioeconomic development of the communities in which we operate. In doing so, we are building a better, more sustainable way of life for the disadvantaged sections of society and are providing a boost to manpower development in the country. We regard CSR as one of the key pillars of our business activities and actively conduct various projects to contribute to making a better world.

OVERSEAS Harmony with the Community

To be a good corporate citizen and a worthy partner in Shangdong and Jiangsu China, Hyundai WIA China has been keeping close to local communities by actively fulfilling its corporate social responsibility. The company has provided scholarships and other assistance to talented but disadvantaged university students in China to fulfill their dreams. Also, the company aims at building a better world by supporting various kinds of environmental protection campaigns such as tree-planting, beach cleaning, and trash clearing in areas where environmental cleanliness is urgently

needed. The company intends to continue organizing various CSR activities with the goal of realizing harmony with local communities.

OVERSEAS Providing Health and Medical Services

While the economy of India has grown rapidly in the past decade, the country's public health system faces enormous challenges. The growing income disparity between rich and poor has served to highlight the lack of access to primary health care for both the rural and urban poor. To solve these problems, Hyundai WIA India has been carrying out social contribution activities focusing on local poverty relief projects since 2013. The company has been helping local health facilities by providing medicines and supplies, supporting research funds, and improving the facilities for patients. The company will continuously contribute to local health promotion, as its goal is to ensure people in need can live healthier and happier lives without pain.

GLOBAL CSR PROJECTS

HYUNDAI TRANSYS

Hyundai TRANSYS is a company that manufactures and supplies powertrains and seats for automobiles to 26 foreign companies worldwide. With focused investments into research and development, we have successfully internalized core technologies and are now recognized as one of the leading seat and powertrain makers in the world. In order to maintain continuous growth for the future, we are involved in various social contribution programs.

Employees	Assets(KRW 100 million)	Revenues(KRW 100 million)
9,721	54,642 ²⁰¹⁸ 51,403 ²⁰¹⁷ 51,816 ²⁰¹⁶	72,155 ²⁰¹⁸ 70,423 ²⁰¹⁷ 79,403 ²⁰¹⁶

GLOBAL CSR STRATEGY

In order to ensure sustainable growth for the future, Hyundai TRANSYS is involved in numerous social contribution activities, while striving to become a great workplace where everyone can thrive together.

Hyundai Dymos and Powertech:
Incorporated into Hyundai TRANSYS on January 1, 2019 to become a corporation.

DOMESTIC A Car for a Bag

The company is conducting the 'A Car for a Bag' project that reuses sheets and leftover leather that are discarded after sheet development and testing and remakes them into bags and high-end accessories. We have signed a business agreement with the social enterprise 'Morethan' and regularly supply leftover resources. As a result, social enterprises are contributing to the creation of jobs by employing women who have been disconnected from their careers and defectors from North Korea for work such as waste collection and fabric processing.

OVERSEAS Community Support in China

In China, Hyundai TRANSYS carried out corporate social responsibility activities in three regions in 2017. Firstly, the Beijing powertrain plant supported an art performance for persons with disabilities and events for a senior citizens center and an orphanage. It also helped teachers and students of a nearby school go on a field trip to the plant. Next, in Rizao, the Rizao plant supported the Rizao Welfare Center and conducted clean-up activities. It also sponsored a sports competition and Chinese speaking contest for Korean descendants. Lastly, the Sichuan plant held an event for poor children in Sichuan.

HYUNDAI ROTEM

Hyundai Rotem has been driving innovation and opening new possibilities for railway systems, manufacturing plants and defense systems. The company is globally recognized as an international leader in heavy industries and is trying its utmost to assist people in need through a variety of social contribution activities.

Employees	Assets(KRW 100 million)	Revenues(KRW 100 million)
3,640	40,022 ²⁰¹⁸ 40,839 ²⁰¹⁷ 44,732 ²⁰¹⁶	24,119 ²⁰¹⁸ 27,257 ²⁰¹⁷ 27,944 ²⁰¹⁶

GLOBAL CSR STRATEGY

Hyundai Rotem actively participates in self-reliance support for future generations. It engages across borders to give hope to the disadvantaged by providing educational opportunities and support to those most in need.

DOMESTIC Railway Ride to Neglected Neighbors, Dream platform

Dream Platform is a program that spreads kindness and joy by selecting neglected neighborhoods located nearby train stations on railways constructed by Hyundai Rotem and linking them with employee volunteers who conduct social contribution activities. In 2017, we provided support for the improvement of safe living conditions for senior citizens residing alone in extremely old housing near Seoul Station on Line 1, support for the growth of children waiting to be adopted in child protection shelters near Hongik University Station on Line 2, support

for the independence of deaf and blind persons by providing cultural interpreters near Gyeongbukgung Station on Line 3, and support through provision of convenient mobility devices for persons of national merit with low income living near Dongjak Station on Line 4.

OVERSEAS Global Dream Platform

Hyundai Rotem renovated a children's daycare center in the Philippines which was damaged due to a typhoon in 2016. We also sponsor scholarships, vehicle operation and a meal service for vulnerable social groups such as children from low-income households. In addition, we provide sanitary items as well as hygiene education for girls. Today, the number of beneficiaries totals more than 3,000 and we look forward to further expanding our social contribution activities.

GLOBAL CSR PROJECTS

HYUNDAI CAPITAL

Korea’s largest consumer finance company, Hyundai Capital, began in 1993 as Hyundai Auto Finance Co., Ltd. and was the country’s pioneer in the installment financing business. Hyundai Capital provides auto finance services in seven countries, including the U.S., the U.K., China, Canada, Germany and Brazil while offering financial consulting for Hyundai and Kia vehicle purchases in Australia, Russia and India.

Hyundai Capital

Employees	Assets(KRW 100 million)	Revenues(KRW 100 million)
2,922	305,283 ²⁰¹⁸ 276,081 ²⁰¹⁷ 251,574 ²⁰¹⁶	30,879 ²⁰¹⁸ 32,435 ²⁰¹⁷ 27,818 ²⁰¹⁶

GLOBAL CSR STRATEGY

Committed to the old proverb, “Give a man a fish, and you feed him for a day; teach a man to fish, and you feed him for a lifetime”, Hyundai Capital does not believe in providing onetime, unilateral support. Instead, the company offers practical support to help underprivileged persons stand on their own feet. Rather than quantifying the performance of its CSR activities, the amount of ‘sincerity’ with which Hyundai Capital operates its social contribution initiatives is the only standard by which CSR is measured. What is more important is the company’s own principle not to follow in others’ footsteps but to choose its path based on the company’s core competencies.

OVERSEAS Keeping HCA Connected to Communities through Philanthropy

Hyundai Capital America (HCA) offers several programs to facilitate employee volunteerism and helps connect its staff with each other and their local communities. With grant programs that support individuals, teams, and entire locations, HCA champions causes from financial literacy and education, to the fight against homelessness, cancer, and hunger. As a part of activities connecting HCA with communities through philanthropy, HCA Dallas operation center adopted an elementary school from 2018 and has

been taught financial literacy, read to classrooms and hosted kindergarten graduation ceremony.

OVERSEAS Let’s plant a tree. It will change the world!

To make the world green, 80 employees in BHAF joined in a CSR activity to plant 120 trees on the outskirts of Beijing. This year marks BHAF’s forth tree planting event since it first began in 2016, and so far some 400 employees have joined in the efforts to plant 450 trees in total. It served as a chance for BHAF employees to feel closer to and take better care of nature under the belief that a small step taken as a CSR activity will be amount to a big step toward safeguarding the beautiful ecosystem. The tree planting even not only added vivid colors to a beautiful spring day but also enabled employees to demonstrate in action the value of protecting and coexisting with nature. Employees at BHAF will continue to make small but meaningful steps forward to protect Beijing’s blue sky and clean water and save our ecosystem.

HYUNDAI KEFICO

Hyundai KEFICO specializes in automotive electronic management systems for engines, transmissions and eco-friendly vehicles. The key components of the electronic control systems created and manufactured by Hyundai KEFICO achieve optimum powertrain efficiency, leading to a more economical and environmentally friendly automotive life. The firm also pursues business for EV 2wheeler motor powertrain system in Asia, keeping pace with the worldwide preference for global feel environment. Hyundai KEFICO will play a role as a credible partner to create new values in society in consideration of the needs and desires of worldwide stakeholders.

HYUNDAI KEFICO

Employees	Assets(KRW 100 million)	Revenues(KRW 100 million)
2,665	17,720 ²⁰¹⁸ 16,216 ²⁰¹⁷ 14,088 ²⁰¹⁶	19,632 ²⁰¹⁸ 17,860 ²⁰¹⁷ 20,116 ²⁰¹⁶

GLOBAL CSR STRATEGY

Symbiosis is the keyword of the worldwide social contribution operations of HYUNDAI KEFICO because it is a way of building consensus for everyone across the border to overcoming the gap between human beings and the environment, the current generation and the future generation, and individuals from all walks of life. Based on this philosophy, HYUNDAI KEFICO conducts environmental protection campaigns, educational support programs, and aid to disadvantaged neighbors, focusing on overseas affiliates, China, Vietnam and Mexico.

DOMESTIC Junior Smart Car Engineering Class

This engineering class aims to cultivate engineering talent by encouraging creative IT technology methods. The Junior Smart Car Engineering Class enables students to drive their own model cars and thus train them to learn the principles of autonomous driving and programming. Through this, learners will develop self-directed learning and creative problem solving skills, and lay the foundation for future growth as engineering students. In 2018, the class was attended by 275 individuals. In 2019, a free semester program is being held for middle school students.

OVERSEAS Operations for Social Contribution to a Better Future Society

Hyundai KEFICO’s primary social contribution activity in Vietnam is the campaign to protect the environment. They planted trees in different areas and set up garbage bins to help build a clean environment. They also helped enhance the educational environment by providing schools with educational materials, reflecting the strong interest of the Vietnamese in education. In Beijing, Rizhao and Chongqing, the firm sponsors local orphanages and nursing homes each year. On holidays such as New Year’s Day, they visited related facilities to help clean up and distribute food.

GLOBAL CSR PROJECTS

HYUNDAI MOTOR
CHUNG MONG-KOO FOUNDATION

Founded by Hyundai Motor Group Chairman Chung Mong-Koo, the foundation pursues the happiness of people and social development. To this end, the Foundation is implementing its philosophy of social contribution in various fields such as education for future leaders, support for the underprivileged and promotion of arts & culture. For 11 years from the establishment (As of the end of 2018), the Foundation had allocated a total of KRW 163.7 billion to social contribution projects, and the number of direct and indirect beneficiaries stood at about 643,222 people.

Education for Future Leaders

The Foundation is actively seeking and supporting talented people in various fields to help them grow into caring and creative future talents. In 2017, we established the ‘OnDream Global Academy,’ a global leader-building program for people who are preparing to enter international organizations and NGOs. OnDream School is a representative project of the Foundation aimed at the development of creativity and humanity among youths. It includes providing education for elementary school students in rural areas and implementing activities for junior and senior students.

Support for the Underprivileged

In addition, to provide medical support at home and abroad as well as customized support for forgotten vulnerable groups, we constantly remain attentive and loving. In particular, we are carrying out a wide range of medical support projects for those in the global community who have poor access to medical systems. We are spreading customized medical support in countries such as Mongolia, Malawi and India, and we invite local medical practitioners and hold academic seminars to help strengthen the medical capacity of such countries and to promote the development of their respective medical environments.

Promotion of Arts & Culture

We are also expanding the range of available opportunities for enjoying culture and the arts, while fostering the dreams of artistic talent and enabling them to discover the value of culture and art in everyday life. Many of our culture and arts scholarship students are known to be some of the most talented artists in the world and are being awarded at international competitions while also receiving recognition from internationally renowned arts organizations. In addition, through the ‘Art Village Project,’ local culture is being revitalized by expanding opportunities for daily enjoyment of culture and the arts.

Vision and Mission

Training future leaders and restoring the Ladder of Dreams and Hopes through scholarships and educational support

Elimination of blind spots in social welfare through domestic and overseas medical services and support for the underprivileged

Pursuit of happiness and development through promotion of arts and culture and mitigation of cultural benefit gaps

Contributions to
Mankind and Society

Key Program

Education for Future Leaders

- Academic scholarships and public service scholarships
- Creativity and character education for elementary school students in rural communities
- Support for peer-group activities of middle and high school students
- Offering education and forums customized for teachers

Support for the Underprivileged

- Domestic and overseas medical services
- Settlement assistance for multicultural families and North Korean defectors
- Enhancement of self-reliance capabilities of a protected child
- Support for young social entrepreneurs

Promotion of Arts and Culture

- Access to arts and culture
- Education for young artists
- Arts and culture in the daily life
